\*Memrise is a learning application which uses a scientific method called "spaced repetition". It lets you revise words at graded intervals (12 hours, 1 day, 6 days, 12 days, 24 days, 48 days, 96 days, 180 days) so that the words are transferred to your long-term memory. We strongly recommend Beginner and Elementary students to study vocabulary every day by using the application so that the method works.
